

Our vision

A workforce planning solution that connects forecast requirements, monthly rosters, leave balances, employee eligibility and fairness factors to support consistent leave decisions.

- Capacity First
- Fair Ranking
- Day-Level Decisions
- Clear Communication

SMART LEAVE ALLOCATION ENGINE

MOVING FROM MANUAL LEAVE DECISIONS TO CAPACITY-LED, FAIR AND TRANSPARENT PLANNING

THE BUSINESS CHALENGE

“ The real requirement is not simply approving or rejecting a request. It is evaluating every requested date accurately and communicating a practical outcome. ”

Competing requests & Multi-day complexity

Multiple employees may request leave for the same date, while available staffing capacity is limited.

A10-day request may contain:

- Working days
- Week offs
- Public holidays
- Available dates
- Capacity-constrained dates

Disconnected information

Decisions may require checking separate sources for:

- Forecast
- Roster
- Comp-off balance
- Earned leave
- Sick leave
- Leave history
- Performance and contribution

Communication gaps

Employees may receive only "Approved" or "Rejected" without knowing:

- Which dates can be accommodated
- Which dates cannot be accommodated
- Whether roster offs are included
- Which leave balance will be used

How the engine works

Leave Request

Monthly Roster Check

↓

Forecast and Capacity Check

↓

Eligibility and Balance Check

↓

Fairness-Based Ranking

↓

Daily Decision

↓

Request-Level Summary

Criteria:

- Capacity
- Eligibility
- Fair Ranking

Final Results:

Each date is classified separately

- Approved
- Waitlisted
- Rejected
- No Leave Needed
- Pending Capacity
- Roster Check Required

What makes the solution smart

- Capacity-led approval
- Partial accommodation
- Roster-aware processing
- Smart balance allocation
- Expiry-aware Comp-off usage
- Consistent employee communication

Example:

Requested period: 10 calendar days

Working days: 8

Roster offs: 2

Approved workdays: 6

Unavailable workdays: 2

Allocation: 2 CO + 4 EL

A clear partial-approval message instead of a generic rejection.

Business impact and closing

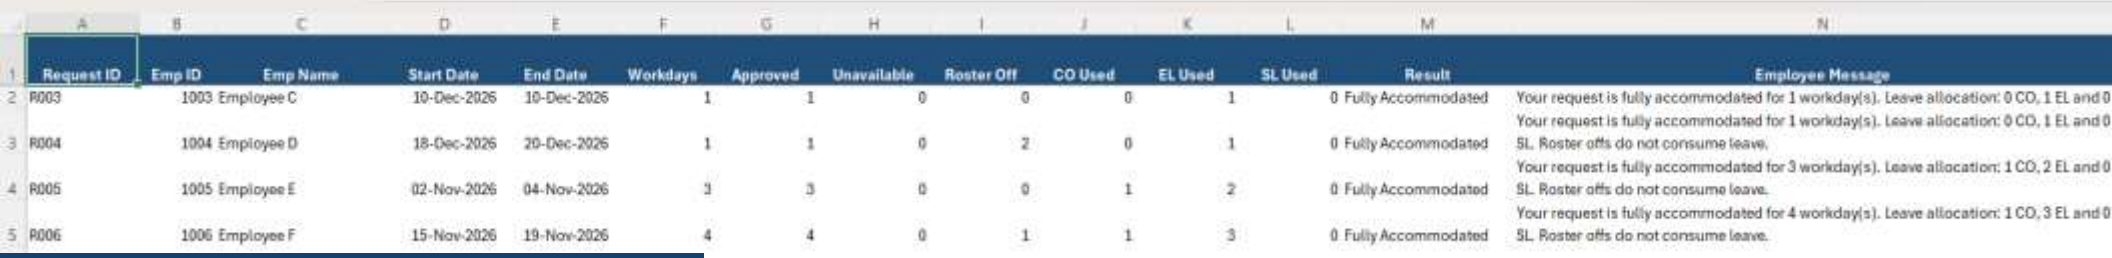

Operational benefits

- Reduces repetitive manual checks
- Provides one view of roster, capacity and balance
- Supports day-level approval for long leave requests
- Reduces accidental leave deduction on week offs
- Identifies missing roster or forecast information
- Creates a repeatable month-closing process
- Preserves an audit trail for balance usage

Employee and management benefits

- More transparent decisions
- Clearer partial-approval communication
- Better utilization of expiring Comp-offs
- Improved consistency across similar requests
- Easier explanation of approved and unavailable dates
- Greater confidence in leave-planning outcomes

Screen shot from the Working File

Request ID	Emp ID	Emp Name	Start Date	End Date	Workdays	Approved	Unavailable	Roster Off	CO Used	EL Used	SL Used	Result	Employee Message
R003	1003	Employee C	10-Dec-2026	10-Dec-2026	1	1	0	0	0	1	0	Fully Accommodated	Your request is fully accommodated for 1 workday(s). Leave allocation: 0 CO, 1 EL and 0
R004	1004	Employee D	18-Dec-2026	20-Dec-2026	1	1	0	2	0	1	0	Fully Accommodated	Your request is fully accommodated for 1 workday(s). Leave allocation: 0 CO, 1 EL and 0 SL. Roster offs do not consume leave.
R005	1005	Employee E	02-Nov-2026	04-Nov-2026	3	3	0	0	1	2	0	Fully Accommodated	Your request is fully accommodated for 3 workday(s). Leave allocation: 1 CO, 2 EL and 0 SL. Roster offs do not consume leave.
R006	1006	Employee F	15-Nov-2026	19-Nov-2026	4	4	0	1	1	3	0	Fully Accommodated	Your request is fully accommodated for 4 workday(s). Leave allocation: 1 CO, 3 EL and 0 SL. Roster offs do not consume leave.

Thank You

Smart leave planning is not about approving more or rejecting more. It is about making the best possible decision based on capacity, fairness, policy and transparency.

How does your organization balance employee leave preferences with service-level and staffing requirements?
